

HDvoice

VoIP Introduction

Hosted IP-PBX

- **Managed, converged Voice and Internet Solution for small to medium sized companies with one or more locations.**
- **Its functionality and affordability enable businesses of any size to have the look and feel of a corporate giant.**
- **Provides local, expanded regional and long distance calling – as well as high-speed Internet access.**

Key Benefits

- **Managed and Hosted Carrier Class VoIP.**
- **Eliminates the need for separate carriers and telephone lines.**
- **Virtual Office numbers for a multi-city local presence.**
- **Portable office phones that can be brought home or on the road.**
- **Lower operating costs – providing savings of 20% to 30%.**
- **Carrier-grade circuits, Cisco Gateways and redundant Sun Servers guarantee quality of voice.**

Delivery

- **Voice and Internet services are delivered over the same broadband access.**
- **Phone calls do not travel over the public Internet, but are transmitted over the Cohere secure private network – for both IP-based and public telephone network terminated calls.**
- **Voice traffic will always have priority over data for consistently high quality calls.**
- **This circuit is dynamically allocated between voice and Internet traffic.**

Working one-on-one with each of your clients and understanding their unique situations is what we do best.
